Measurement metrics

Circumference is total length around the finger. (using a string or tape)

Diameter is the distance across the hole of the ring, (inner edge to edge)

Measuring methods

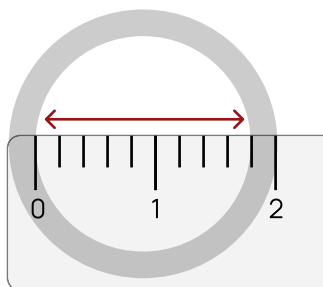

How to Measure with a Ring You Already Own

What you'll need:

- The ring (make sure it is not bent or oval-shaped).
- A standard ruler with centimeter (cm) or millimeter (mm) markings.

The Steps:

1. Place the Ring: Lay the ring down on a flat surface.
2. Position the Ruler: Place the ruler directly on top of the ring.
3. Align: Line up the "0" mark of the ruler with the inside edge of the ring on the left side.
4. Measure: Read the measurement at the inside edge of the ring.
5. Count the Measurement: This number is your Inner Diameter. Use this number to find your size on the chart.

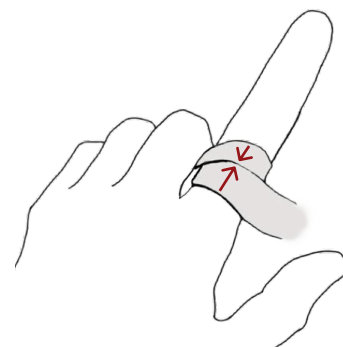

How to Measure Your Finger with Paper or String

What you'll need:

- A thin strip of paper (about 1/2 inch wide) OR a piece of non-stretchy string.
- A pen or marker.
- A standard ruler with centimeter (cm) or millimeter (mm) markings.

The Steps:

1. Wrap It: Wrap the paper or string around the finger you want to wear the ring on. Place it near the base (where the ring will sit).
2. Mark It: Hold the spot where the paper/string overlaps. Use your pen to draw a line across both layers so you have a clear mark on both ends.
3. Measure It: Lay the paper/string flat on a table. Measure the distance between the two marks with your ruler.
4. Find Your Size: This number is your Inner Circumference. Match it to the sizing chart.

Lets calibrate

To calibrate and find your size, print pages **3** and **4** in A4 sheet in actual size (Scale : 100%).

Place a credit card (bank card or ID) on the provided template after printing to ensure the scale is correct

Find your size

Find your size by placing your existing ring in the provided template to match to the nearest size.
